Energy Efficiency

Description of Action:

We upgraded our heating and cooling system throughout our 25,000 square foot complex. Our new energy efficient HVAC units have reduced our energy bills by 28%, savings us approximately \$683 per year.

Money Saved:

683

Hazardous Waste/Toxic Use Reduction

Description of Action:

PFM's work with Pinnacle Cosmetic Packaging in Kenilworth, NJ helped achieve a significant reduction in the company's hazardous waste. PFM designed a waste reduction program that allowed all flammable fragrance off-spec materials to be recycled at licensed ATF facilities. This effort removed over 11,000 gallons of rejected liquid from the hazardous waste stream. Measurable benefit: 11,000 Gallon Reduction

Waste Recycling

Description of Action:

PFM recycles all paper and comingled waste. Throughout our offices we provide numerous recycling bins and cartons to encourage recycling.

Provide Environmentally Preferable Products Services

Description of Action:

PFM designs and installs new highly efficient waste compaction equipment, and identifies opportunities for the separation and marketing of recyclable materials.

Certification Programs Other

Description of Action:

PFM is a Green America Approved Business. Many of Green America's standards for certified businesses mandate the "use of a green office or facility, including resource reuse and maximum use of postconsumer recycled resources as well as maximum water and energy efficiency." Companies bearing Green America's Green Business Certification have some combination of these practices.

Support Community Initiatives

Description of Action:

PFM regularly donates toys, art supplies, clothing and other items during the holiday season to the State of New Jersey Intensive Supervision Program and to the nonprofit Access Family Services to help at risk families and children.
